### GAS PRICES (INDUSTRIAL)

1 January 1993

A study of the variations in national currency taxes excluded prices since July 1992 reveals that:

- Denmark, Italy and Luxembourg are the only Member States to record a rise in prices. The growth went from 6.6 to 7.9% in Denmark, and from 2.1 to 2.5% in Luxembourg, the highest rise affecting middle size consumers. In Italy, the situation is more divergent, as I1 and I2 underwent a 4% increase, except in Naples where growth is only 3%, while the other standard consumers increased by only 2%.
- The prices for Ireland and Portugal remained stable, while in Belgium prices decreased, the most important reduction being for the largest consumers with a 1.5% fall in prices. In France, the same phenomenon could be noticed, but prices of consumers I3-1 and I3-2 remain unchanged. In Germany, a fall in prices can be seen particularly for I4-1 and I4-2, although there are regional disparities affecting all consumers.
- Some countries experience particularly irregular developments. In Spain, I3-1 and I3-2 decreased a little whereas the other consumers rose slightly. In the United Kingdom, there is an alternation of rises and reductions, with a 4.4% rise standing out for I5. In the Netherlands, gaps are even more perceptible, as I1 and I2 fall by 6%, I3-1 and I3-2 being relatively stable and prices for other consumers increasing by 3%.

During this period, the increase of the VAT rate from 14 to 15% in Germany, from 13 to 15% in Spain and from 18.5 to 17.5% in the Netherlands can also be noticed.

Council Directive No 90/377/EEC of 29 June 1990 lays down a Community procedure to improve the transparency of gas and electricity prices charged to industrial end-users.

In accordance with Article 1.1, this note sets out the prices for standard consumers in force as at 1st January 1993.

Seven standard industrial users, coded I1 to I5, were chosen :

Annual consumption					Modulation
I1	418,60	GJ or	116 300	kWh)	No load factor laid down
I2	4 186	GJ or	1 163 000	kWh)	200 days
I3-1	41 860	GJ or	11,63	GWh)	200 days 1 600 hours
I3-2	41 860	GJ or	11,63	GWh)	250 days 4 000 hours
I4-1	418 600	GJ or	116,3	GWh)	250 days 4 000 hours
I4-2	418 600	GJ or	116,3	GWh)	330 days 8 000 hours
I5	4 186 000	GJ or	1 163	GWh)	330 days 8 000 hours

Prices for the standard consumers are given in national currencies, PPS (purchasing power standard as at 18 March for 1993) and in ECU (average value for January 1993).
